DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of figure 5 in the reply filed on 1-16-06 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 11 and 17, it is unclear whether the seat moves through an elliptical path . If the seat and the portion share a common point and that point moves in an elliptical path then the seat will move in an elliptical path.

In claim 15, "the support" lacks antecedent basis.

Claim 23 recites "means for encouraging" which is grammatically awkward and indefinite because the "encouragement" connotation does not necessarily result in the movement of the seat.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3764

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 16 is rejected under 35 U.S.C. 102(a) as being anticipated by Eschenbach (855).

Eschenbach discloses an elliptical recumbent exercise device having rowing handlebars 696, a movable seat 643, and elliptical motion linkage assemblies which are broadly interconnected between the seat and the frame 632.

6. Claim 16 is rejected under 35 U.S.C. 102(a) as being anticipated by Maresh et al (635).

Maresh et al discloses an elliptical recumbent exercise device having rowing handlebars 570, a movable seat 581, and elliptical motion linkage assemblies which are broadly interconnected between the seat and the frame 523.

Allowable Subject Matter

7. Claims 1-10 are allowed.
